Subject: Fw: REF: PROF. ALSTON'S REPORT

Hi Asoka,

I alluded to the Goldstone Commission report (not directly) in my missive to Alston. Yes, the question is why indeed. Anything more from this bastard and we should send him such a stinker that he would be loth to show his face again. This is great ammol

Cheers,
A.

P.S. Although Rohan has not identified the writer I suspect it is Ernest Corea.

Got this from a friend of mine. Thought you would like to see it.

Rohan

"thanks, rohan. i find it surprising that nobody has asked : why is a un official pushing for investigations into alleged war crimes in sri lanka when he has steadfast refused to respond to a proposal by a commission appointed by the un human rights council and chaired by a distinguished south african jurist who is jewish (judge goldstone) that an international investigation should be held into war crimes in gaza by both the israeli armed forces and, to a much lesser extent, by hamas. the un human rights council endorsed the goldstone report's findings and recommendations. so did the un general assembly which sent their endorsement to the security council. then, a stone cold silence by the un. it is as if a protective wall has been built around the israely armed forces so that alleged perpetrators of war crimes can remain undetected, and impartial investigaors cannot go after them. is ban taking his name so seriously that he has privately banned further action on the goldstone report ? then why is he stirring the sl pot?"
